***Information Disclosure Statement***

The information disclosure statement filed February 28, 2005 has been considered and has been made of record.

***Response to Amendment***

The preliminary amendment filed October 11, 2005 is acknowledged; claims 1-32 is presently pending.

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-32 are rejected under 35 U.S.C. 102(b) as being anticipated by Tanaka et al (USP 6,489,435).

The applicant is claiming a continuous production method of a polyamide comprising continuously melt polymerizing in a multistage reaction vessel a xylylenediamine component and a dicarboxylic acid component under specific process conditions.

Tanaka et al (USP 6,489,435) discloses a process for producing polyamides by polymerization of a diamine component comprising 80 mol% or more of xylylenediamine and a dicarboxylic acid component employing reactants and process conditions as instantly claimed. See abstract; col. 2, lines 60-67; col. 3, lines 1-12,13-27, 30-50,55-67; col. 4, lines 1-25,49-67; cols. 5-7; the examples and the claims.

***Prior Art***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. These references are cited to show the state of the art of preparing polyamides; Toyobo, Marchildon and Mohrschladt.
